**Forecast for Tuesday 29 Jun 2021**

**Weather:** Overcast and dull for much of Tuesday morning with patchy light rain or drizzle and fog across the summits. Any rain will fade late morning onwards with the cloud slowly lifting and breaking to give some bright or sunny spells by mid-afternoon. At the same time scattered showers will develop, with the odd heavy one possible late-afternoon (low risk of thunderstorms), before dying away late to leave a dry evening with clear spells.

**Chance of cloud free mountain/hill tops above 600m:** 20% at first improving 70% by mid-morning and to 90% or better in the afternoon.

**Visibility:** Locally good in valleys through the morning, but moderate in any rain or drizzle with only misty cross valley views, and with areas of cloud covering slopes above 400-600m. Improving to widely good around midday with cloud lifting to leave only patches around 700m, however expect some brief deteriorations in any heavy showers. Cloud will break and lift clear of the summits early evening onwards.

**Meteorologist's View**

Widespread murky conditions are likely on the summits during Tuesday morning. Some strong sunshine is possible during any sunnier spells in the afternoon and so remember to pack your sun protection.

**Recent rainfall:** measured at Neuadd: altitude 353m

| Recorded at | Last 24 hours: | Last 48 hours: | Last 72 hours: |

**Forecast for Wednesday 30 Jun 2021**

**Weather:** Dry with clear spells during the early hours, with perhaps some shallow fog and patchy low cloud developing in valleys for a time around dawn. The morning will be dry with some sunny spells, but a few showers are likely to develop during the afternoon, these fading later to leave a dry evening with partly cloudy skies.

**Maximum wind:** Northerly 10-15mph.

**Chance of cloud free mountain/hill tops above 600m:** 70% becoming 95% or better by midday.

**Visibility:** Locally poor in any valley fog around dawn, and with some shallow banks of low cloud briefly bringing poor visibilities on slopes above 300m as the fog lifts and clears. Otherwise generally very good visibility at low levels with some patchy cloud briefly developing on slopes above 700m mid-morning, this lifting clear of the summits by midday, and with only brief temporary deteriorations in any afternoon showers.

**Temperature:** **Valleys:** Plus 12 Celsius becoming Plus 21 Celsius
**At 600m:** Plus 14 Celsius.
**Freezing level:** Well above the summits.
